Any good news on the hiv/brand suppliers?

No shipping news I'm making progress with paperwork

Ok. The natives are getting restless... no hiv, no brands, no oxy 30, no lactogen... tough to sell with no product. I have them all believing it is the new system, but that can't last much longer or they might go elsewhere permanently

I'm going to probably dump all goals this month but don't tell anyone. I know it's more about income either way

Yeah - not hitting goal blows, but not getting paid is worse. Makes sense though... doubtful I hit \$62k missing this much of the month

Yeah I'm on a rampage with compliance to get some stuff rolling

This has been a bit different than expected, huh?

Just all at once between product and system

Last year we did 4 million in April, we'll do 10 this month still easy
